ROMAN'S PRODUCT OWNER FRAMEWORK

UNDERSTANDING DIFFERENT TYPES OF OWNERSHIP

|				
1		Scrum Product Owner	Owns a product in its entirety: empowered to make strategic decisions in addition to tactical ones.	
2		Product Portfolio Owner	Owns a group of (related) products.	
3		Feature Owner	Owns a product capability end users interact with.	
4		Component Owner	Owns an architecture building block of the product, e.g., data access layer.	
5		Platform Owner	Owns a software platform, a collection of shared assets other products use.	
6		SAFe Product Owner	Owns the detailed product functionality (team backlog).
